1995-96 and Fall 2001

EDUCATION

B.S.E.E. University of Buffalo
A.A.S. Engineering Science SUNY at Canton

Prospective Role: Northeast District Secretary-Treasurer

For more than 35 years, since my first introduction into the field, ITE has been an important part of my personal life and professional development. It would be an honor to serve the Northeast District as its Secretary-Treasurer.

I have to say that the people are what make the profession and ITE attracts some of the most fair and competent people that I have dealt with. The Northeast District is aggressively moving to entice more and more young people into the profession. The push in recent years to higher standards at all levels is one that we should embrace, as it is important that the profession and the Northeast District continue the constant push for greater exposure for its members to the benefits of constant professional development.

I cannot recall how many District 1 or Northeast District meetings I have attended, but it is a double digit number. They are always valuable on many levels and I always learn something at the traffic bowls.

Thanks for considering me for this position.

Experience prior to FST: Traffic Systems Analyst in the Program Development section of the **MBTA's Construction Directorate.**
Senior Transportation Engineer with **Public Technology, Inc.** in Washington, DC.
Engineer/Planner with **Alan M. Voorhees & Associates, Inc.** in its Buffalo, San Diego, San Bernardino, San Francisco, and Los Angeles California offices.
